

Health declaration

Are you ready to take your final exam? If you are, the CBR will have to check your mental and physical state before allowing you to take the exam. This is important in order to ascertain you will not be a danger in the traffic. This check-up will be done by answering a few questions, which you can find on the website: mijn.cbr.nl

Attention: we recommend you discuss this check-up with your driving instructor before filling it in online.

Apply for this test on time

As it can take up to four months before you receive a check-up. So, make sure you complete the form as soon as you start taking your lessons, after having discussed it with your instructor.

Visiting a specialist for ADHD / ADD / Autism

Did you answer question 3 (or more) with a YES, regarding ADHD, ADD or autism? And you have never previously had a driving licence exam? If that's the case, you can make an appointment with an independent specialist to do your driving licence exam.

You can always contact your driving instructor if you have any more questions.
